## DETAILED ACTION

### *Claim Rejections - 35 USC § 103*

The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

Claims 1-14 are rejected under 35 U.S.C. 103(a) as being unpatentable over Koch et al.'415 (Koch) in view of Landry, Jr.'098 (Landry). Koch discloses a coupling mechanism for a work vehicle (figures 1-12), the coupling mechanism having a frame 66 for mounting to the work vehicle, the frame having left and right side members (as seen in figure 3) and a cross member. Also, Koch discloses the mechanism having attaching members 32 coupled to each side member and a hook member 36 attached to each of the attaching members. Further, Koch shows the hook members being removable/replaceable (via 60) but fails to show the hook containing different sized coupling members existing perpendicular from one another. However, Landry teaches that it is well known to provide a hitch member with differently sized attaching means (figures 1-6). Further, Landry teaches the means being attached perpendicular, having a main bore and coupling pin 16 and being changeable through two position/stage

reorientation of the hitch member (column 3, lines 45-60). It would have been obvious to one having ordinary skill in the art at the time the invention was made to provide the device of Koch with the teaching of Landry in order to provide a coupling mechanism having greater operational range.
